
JC Startup: User module difficulties

Posted by benwk - 2009/08/03 05:38

Hi there,

I followed the installation and configuration instructions word for word, but the slideshow doesn't work when it's in the "slideshow" position. If I set it to other user module positions, it works fine.

I tested all module positions with "Newsflash" and the following didn't work:
User 1, 2, 8, 9, and top.

Joomla is v 1.5.11.

What am I missing?

Thanks in advance for your help.

Hey there benwk,

that sounds a bit odd - can you give me an example url/link where I can see this issue?

Thanks,

Ed

Hi Ed,

Absolutely. But I don't want to post it on the forum, though. Can I send through the contact form?

Ben

ok - the best thing to do is to email info at joomlacreative.com
i'll be offline for a couple of hours now but will get back to you asap later today

Ed
